

Environmental Policy Statement

Cleansweep Vac Services is committed to minimising the impact of its activities on the environment and working towards all the environmental legislation that relates to the Company.

The key points to achieve this are:

- **Reducing toxic emissions** through the reduction of unnecessary journeys, efficient routes and scheduling of chimney sweeps and quotations and the selection and regular maintenance of our vehicles and the use of 100% green renewable electricity in our office and tools and choice of vehicles were possible.
- **Reducing waste** by evaluating operations and ensuring they are as efficient as possible, including the use of water and purchasing in bulk with less plastic packaging, vegan / eco-friendly products when possible.
- **Actively promote recycling** both internally and amongst our customers and suppliers.
- **Actively promote the Clean Air Act 2018** amongst our customers and staff and make aware of environmental impact of customer choices in materials and appliances.
- **Make use of and promote products** that have low environmental impact in the office and on-site with staff, suppliers and customers, including 100% recycled paper used when printing is necessary and double sided printing to save paper.
